

AQUA Logic Siphon-C-Ultra drinking water filter

The **Siphon-C-Ultra** concept is a unique, straightforward and compact drinking water filter, developed for the fast growing group of people in the world that has no excess to clean and safe drinking water.

This three-stage water filter consists of a double sided fleece Filter Sleeve as sediment filter, a 100% organic Activated-Carbon block, combined with a assembly of Holo Fibre Ultra-membranes.

The **Siphon-C-Ultra** provides drinking water for a family in a disaster situation, refugee camp or underdeveloped region. The filter adsorbs substances dissolved in water, and captures micro-organisms, such as bacteria (E-coli reduction > 99.9999 %).
